

Galatek

Intelligent Automation for Discovery Workflows

INTRODUCTION

Many organizations are still searching for a technology partner that truly understands their workflows. Galatek was built to be that partner.

A Singapore-based intelligent automation company, Galatek delivers configurable and custom-built systems across the life sciences — supporting everything from routine operations to advanced and emerging research.

By combining precision engineering, robotics, and AI-native software, Galatek helps laboratories standardize complex processes, improve reproducibility, and scale their workflows.

Extensible instruments. Scalable workflows.

Galatek's portfolio spans three tiers — each designed to meet laboratories where they are and to grow with them over time.

THE GALATEK PORTFOLIO

Standalone

Singular instruments with onboard software tailored to specific workflows

- **Highlight:** The Titan2000 platform enables the full workflow for organoid culture and drug screening

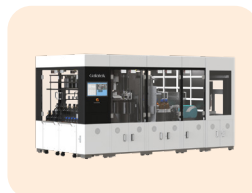

Genesis

Integrated platforms that combine automation, sensing, and intelligent software

- **Highlight:** The Galatek Smart Plate Handler is designed to create a flexible integration of instruments around a 4-axis collaborative arm and consumable stacker

Gateway

Multi-instrument platforms using a robotic arm and onboard software

- **Highlight:** The Seloris Integrated Mobile Phase Preparation System automates bulk preparation of mobile phases for high performance liquid chromatography (HPLC) and liquid chromatography-mass spectrometry (LC-MS) methods

CUSTOMIZATION

The Galaxy Custom Lab

Galatek designs and builds customized systems in-house and with its partner network, an approach that allows laboratories to:

- Align automation precisely with scientific and operational workflows
- Integrate systems seamlessly into existing lab infrastructure
- Evolve automation as research, scale, and regulatory needs change

Highlight:

Antibody Drug Discovery & Production

APPLICATIONS

Where Galatek helps

2D & 3D cell & organoid culture

Drug Discovery

Next Gen Sequencing

Synthetic biology

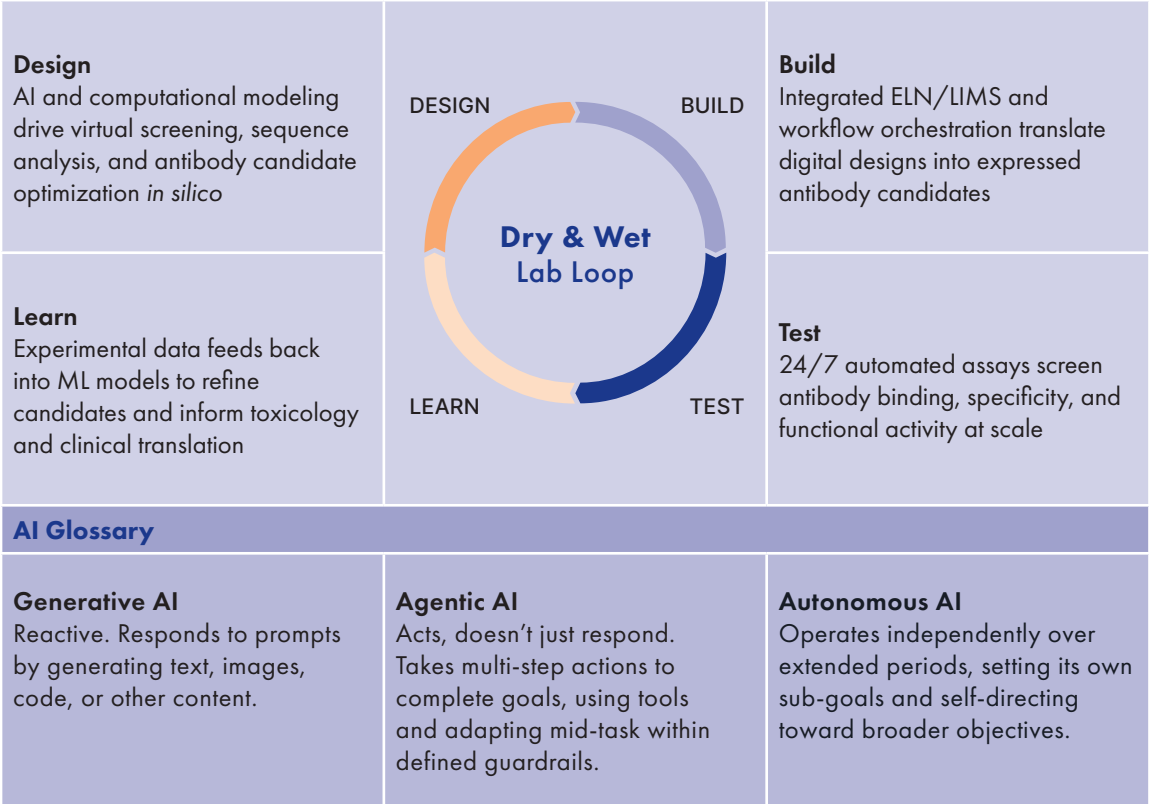

Cell Imaging

Pharma QC

AI-DRIVEN WORKFLOWS

Intelligence, by design

OUR APPROACH

How we work with you

Whether your automation goals are big or small, Galatek is committed to understanding where you are now and what you're trying to do – today and down the road.

OUR MISSION

Accelerating industrial innovation

To help scientists and engineers accelerate industrial innovation through flexible, AI-driven automation built around real-world workflows.

ABOUT GALATEK

Galatek delivers intelligent automation across life sciences, applied chemistry, semiconductors and sustainable energy—anywhere precision, reproducibility and data integrity matter most.

Headquartered in Singapore, with R&D, delivery and service teams across the US, Europe, and Southeast Asia—we pair global scale with local execution.
